DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. The rail (as in Claim 8) (an element of Figure 4 which does not have a curvilinear translation) is not present and disclosed as in the embodiment claimed in claim 1 (having a curvilinear translation). A pivoting bar (claim 16), the displacement of the embodiment of Figure 4 (having the piston) having a curvilinear translation, the inflation module that stiffens the floor (Claim 24), the inflatable structure comprising metal (Claim 25) (as Examiner understands this is a detail of the embodiment of Fig. 1,2), the thickness of the metal (Claim 26), or having folded sidewalls (Claim 27) does not exist in the embodiment having a piston (from claim 15).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 9 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

The displacement of the seat "approximating" curvilinear translation is already claimed in claim 1.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3616

Claims 8, 16, 19 and 24-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

As discussed above, claim 1 claims a curvilinear translation (Figs. 1 and 2) and Claim 15 claims a piston (Figs. 4 and 5). The disclosure does not provide for the characteristics and structure of one embodiment in the other embodiment.

Therefore, Claim 8 is structure of Figure 4, depending from Claim 1 relating to and not present in Figure 1.

Claims 16,19, 24-27 are characteristics or structure of Figure 1 depending from Claim 15 relating to and not present in Figure 4.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8,15-22 and 24-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 does not properly depend from Claim 1 as discussed above.

Claim 15 recites the limitation "the piston" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3616

Claims 16,19 and 24-27 are unclear. These claims are drawn to a different embodiment than the embodiment in Claim 15.

Allowable Subject Matter

Claims 1-7, 10-12 and 29-35 are allowed.

Claims 15,17,18 and 20-22 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
